Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAIL ACTION

Notice to Applicant(s)

1. This application has been examined. Claims 1-12 are pending.
2. The prior arts submitted on July 18, 2005, July 25, 2006 and November 07, 2006 have been considered.
3. Receipt is acknowledged of papers submitted under 35 U.S.C. § 119, which have been placed of record in the file.
4. Claims 14 and 15 should be depended on claims 12 instead of 6 because these claims are the apparatus claims. Correction is required. For the rejection below, it is assumed that claims 14 and 15 depend on claim 12.
5. Claims 5-11 and 16-23 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim should refer to other claims in the alternative only and/or cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 5-11 and 16-13 have not been further treated on the merits.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1, 2, 12 and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Yamwaki et al. (6,091,214).

8. Yamawaki et al. disclose the invention as claimed which includes a control unit comprising a slip angle difference predicting section for predicting a difference between a slip angle of front wheels and a slip angle of rear wheels, and a correcting section for correcting a target torque signal supplied to the motor (see at least the abstract, figures 2-5 and the related text).

9. Claims 3, 4, 14 and 15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. None of the prior art of record disclose the steering characteristic determination step in which even if the behavior amount falls under the under-steer characteristic, if it exceeds a predetermined under-steer determination value in the vicinity of neutral steer determination value while the behavior amount differentiated value is positive, it is determined that the steering characteristic is over-steer, and under-steer characteristic determination step in which even if the behavior amount falls under the over-steer characteristic, if it is below a predetermined over-steer determination value in the vicinity of neutral steer determination value while the behavior amount differentiated value is negative, it is determined that the steering characteristic is under-steer.

Conclusion

10. Claims 1, 2, 12 and 13 are rejected. Claims 3, 4, 14 and 15 are objected. Claims 5-11 and 16-23 have not been further treated on the merits.
